

Books to help you get the most from your Spectrum

Spectrum plored

by Tim Hartnell Foreword by Clive Sinclair In this practical guide — with programs throughout - Tim Hartnell takes you from your first steps in programming to show how the ZX Spectrum can be used as a tool at home, at work, and for education. He looks at the use of colour, sound and 3D graphics, and shows how to write programs in BASIC as well as how to use machine code on the ZX Spectrum. The ZX Spectrum Explored is complete with many programs for education, business and not least - pure fun! £5.95

Dynamic Games for the (Spectrum

by Tim Hartnell

In this book Tim Hartnell brings you twenty dynamic games for your ZX Spectrum. They range from board games such as Chess and Pirandello, to arcade action in Jogger and Deathrace 2000, and include a major adventure game, Revenge of Castle Dread. Every game is introduced in detail and, in most cases, the program is explained line by line. The tricks and techniques the programmers have used are highlighted and Tim Hartnell suggests how these can be applied in your own programs. £5.95 186 pages
